

Assignment #1

1. Write a program to print the sum and average of given numbers. Use loop statements and arrays.

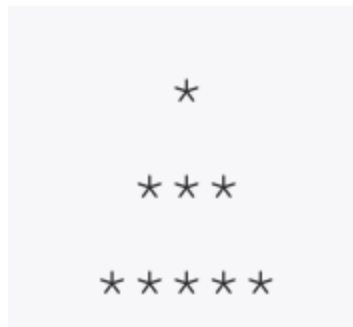

40, 192, 38, 291, 48 ,45, 200, 300, 46

2. First, declare the integer variable x. If you assign 4 to the x variable and run it, you should get the ex1 picture. If you assign 3 to the x variable and run it, you should get the ex2 picture.

ex1) int x = 4;

ex2) int x = 3;

Write a program to print the result of the following operations. Use loop statements.

(hint1. System.out.print() -> this does not add a line break at the end of the line)
